JavaScript	Vue.JS	GitHub
SQL Server	EF Core	-
-	WPF	-

PROJECTS

The Website Aggregator of Utility Services (Kvitel.ru)

Full Stack Developer (Full Time, March 2021 - present)

Description: Ingaged in the development and maintenance of a web application using ASP.NET and Vue.js. Collaborated with the development team using Git and GitHub for version control and project management. Created 12 controllers, 92 backend features and 142 frontend components

Technologies and Tools Used: ASP.NET, Vue.JS, Git, GitHub, C#, JavaScript, SQL Server

Specific Accomplishments:

- Developed an extension method for creating dynamic queries utilizing object properties without typecasting, by constructing a lambda query utilizing reflection and expression trees. As a result, development speed is increased by 15%.

-Provided guidance and support to new team members in understanding and navigating the system. Resulting in a 100% success rate in onboarding new team members

Schedule Display App using Remote API

Freelance, April 2022 - May 2022

Description: Implemented a responsive design that was well-received by the client. Utilized the MVVM pattern with dependency injection to create a highly modular and maintainable codebase. Wrote an asynchronous background system for updating data from the API and handling errors.

Technologies and Tools Used: C#, WPF, Git, GitHub

Specific Accomplishments:

-Created a dynamic string length resizing feature based on available space in a table and event duration, ensuring optimal user experience and readability.

EDUCATION

Bachelor's degree in Computer Science
2018 - 2022
